

Our Offered Services

Revenue Optimisation in the Power Sector

We help DisCos to increase their revenue by identifying and enumerating your customers and assets. We use advanced data analytics and segmentation techniques to understand your customer behavior, preferences, and needs.

Data Systems Management

Server management, data analysis, and data optimization require specialized skills, tools, and best practices to ensure optimal performance, reliability, and security of data systems.

We assist organizations with the design, implementation, and maintenance of their server infrastructure and data analysis platforms. We employ cutting-edge technologies and best practices to keep your data safe, dependable, and accessible.

Our Offered Services

Revenue Protection, Collection and Debt Recovery

We offer revenue protection as a service, assisting DisCos in managing revenue losses and fraud by applying cutting-edge technologies and processes to prevent, identify, and resolve revenue leakage risks.

We also assist DisCos in collecting outstanding debts from delinquent consumers. We apply data-driven prioritization, mitigation, and litigation tactics to simplify the debt collection and recovery processes.

Electricity Vending System

We provide a convenient, cost-effective, incentivized, and flexible way for your customers to purchase electricity. We offer a variety of electricity vending systems, such as prepaid, postpaid, smart, wireless, and keypad meters. Our systems are compatible with multiple communication technologies and support third-party data integration. We also provide a robust online payment solution for customers to recharge their meters easily.

Asset Valuation

Midstream Solutions provides asset valuation and tagging services to companies in the power sector. We use industry-standard methods and tools to perform asset valuation and tagging. In addition, we support our clients in tracking and monitoring their assets throughout their lifespan by employing barcode, QR code, or RFID labels. DisCos may enhance their inventory management, reporting, and record-keeping with our asset tagging and valuation services.
